Iron Age designs and manufactures decorative cast metal drain grates, tree grates and site furnishings. Made in the USA, our artfully designed trench and catch basin grates are engineered to fit the most widely used drain bodies on the market today. These grates can be specified during the project planning phase or retrofitted into existing installations. We also partner with architects, designers, artists and municipalities to create custom castings in iron, bronze and aluminum. Visit our website to find out how Iron Age can help inform and inspire your creativity.

PRODUCTS
Iron Age’s designer cast iron products include:
- Trench grates, available in both straight and custom radius
- Catch basin grates
- Tree grates
- Site furnishings, including bollards, planter fences and benches/seating
All grates are ADA compliant, and heel-proof options are also available.

PERFORMANCE
Durable as they are beautiful, Iron Age grates are designed to last a lifetime. Cast metal ages gracefully and never needs upkeep. Most of our grates are rated for vehicular traffic, and heavy-duty options are available.

SUSTAINABILITY
Iron Age Designs’ cast metal products contain a minimum of 80% recycled materials, and are 100% recyclable. To bypass the bright orange oxidation phase of raw iron, we offer an eco-friendly finish using recycled vegetable oil. Manufacturing in various locations around the U.S. allows for potential LEED credits for local production.
ABOUT
IRONSMITH, the leading supplier of standard and custom tree grates and trench grates for over three decades. As an employee-owned company, we take pride in our products and are proud to be the sole provider of the Paver-Grate® Suspension System.

PRODUCTS
- Tree grates
- Paver-Grate®
- Trench grates, available in both straight and custom radius to meet your design needs
- Tree guards
- Bollards, both permanent and removable
- Pipe bollards and caps
- Custom capabilities from logos to complete one-of-a-kind castings
Materials include: iron, aluminum, bronze and now stainless steel.

PERFORMANCE
IRONSMITH tree grates allow for the tree opening to be expanded to accommodate tree growth thus protecting the tree from injury. All castings are made with slot openings of 1/2” or less to ensure pedestrian safety. We offer pedestrian rated and traffic (H-20) rated castings.

SUSTAINABILITY
IRONSMITH cast products are made from 100% post-consumer recycled metal and are 100% recyclable. Potential LEED credits available.
ABOUT
Locinox is the leading global manufacturer of high-quality gate and fence hardware. We specialize in developing innovative solutions with unmatched quality. What sets Locinox apart is our extensive line of products for outdoor applications. Although it’s a niche market, we want to provide top-notch, innovative solutions to advance the outdoor access control industry. Our comprehensive line of locks, hydraulic gate closers, and access control hardware is built with industrial quality for exterior use. For more product information, visit www.locinoxusa.com.

PRODUCTS
Locinox offers a variety of gate closers and hardware for new and retro-fit installations. Our solutions include hydraulic, ADA compliant gate closers, automatic and electronic access control products, swing and slide gate locks, mechanical code locks, electromagnetic locks, hinges, drop bolts, accessories, and more!

PERFORMANCE
Locinox products are developed using four key criteria: innovation, industrial quality, weatherproof, and ease of installation. They’re manufactured using high-quality, weather-resistant materials and are tested over 500,000 movements to guarantee durability and reliability that eliminates maintenance and call-backs!
ABOUT
Since 1993, greenscreen® has fabricated elegant and efficient solutions for vine-based vegetated facades with more than 10,000 projects ranging in scale and complexity. Resources at greenscreen.com include information on system design, detailing, modeling, plant selection, and maintenance. Our team of project managers and CAD specialists have degrees in architecture, landscape architecture or another design discipline and are focused on customer service to ensure the success of your project.

PRODUCTS
USA-fabricated greenscreen® trellis panels are rigid, light-weight, 3-D precision-welded wire 3” deep designed to support vines and climbers. Mounted to walls or structures, to posts as a fence or to planters, they can be configured in unique applications using standard or custom hardware. Curved panels can also be mounted to posts as column wraps.

PERFORMANCE
greenscreen® panels and clips are fabricated from galvanized steel and have a polyester powder coat finish for durability. Vegetated greenscreen® panels passively contribute to public health and well-being, providing shade and the environmental benefits of lower surface temperatures, trap airborne dust particles, provide privacy and mitigate views according to the leaf canopy of the plant selected. A fluoropolymer coating is available upon request, and is recommended for coastal applications.

SUSTAINABILITY
Integrated with LID strategy standards and practices, greenscreen® complies with LEED® V4, Sustainable Sites® II and other ratings systems. Sustainability benchmarks such as a Recycled Content declaration, a Health Product Declaration, and third party-verified ISO 14040/14044 Life Cycle Assessment report are available at www.greenscreen.com.
ABOUT
We strive to elevate the standard in architectural lighting. We are inspired by the many ways our products help you create extraordinary projects. Our materials, innovation, and lifetime warranty lead the industry today and will continue to do so for years to come. We invite you to experience the difference.

PRODUCTS
Auroralight exclusively utilizes natural copper and brass. Chosen for superior durability and its thermal properties, that material makes sure our luminaires will endure the harshest of environments. With time and exposure to the elements, copper and brass will form the classic verdigris patina for which it is known.

PERFORMANCE
Exquisitely crafted and time tested on properties around the globe. Trusted by lighting professionals for more than 22 years. State-of-the-art engineering, CNC machining technology, and decades of real-world lighting experience are put together to produce a family of exceptional products designed, manufactured, and assembled in Carlsbad, California.

SUSTAINABILITY
We believe that improving the environmental performance of our business starts with our products. We carefully examine our products throughout their life cycle, including controlling the quantity and types of materials used in their manufacture, improving their energy efficiency, and designing them for better recyclability.
ABOUT
CAST Landscape® designs and manufactures solid bronze low-voltage landscape lighting that's considered best in class, built to last tools for the professional designer. For more than 18 years we have prided ourselves as a premier manufacturer of low-voltage landscape lighting fixtures, transformers, wire, and other system components. Our Solid Sand-Cast Bronze lighting fixtures and integrated LED technology has proven to be built to last and has been enjoyed for many years in the most demanding environments.

PRODUCTS
The Adjustable Beam/Lumen Spotlight (SBLABL1) is a field adjustable beam and lumen levels that provides endless beam spread and brightness design possibilities. This fixture is powered by second generation Cree CXA series LED. This is IP65 rated with moisture relief valve for no condensation accumulation, and has a brass body and knuckle.

PERFORMANCE
The SBLABL1 beam angle’s adjustment range is from 20° to 60°. With a lumen output of 245-1,080 and a color temperature of 2,800°K, this fixture has 85 CRI, and L70 50,000 Hrs. LED. It also has an AC/DC power range of 12V-15V and can operate in the temperature range of -30°C to +45°C.
ABOUT
Sternberg Lighting designs and builds decorative and functional outdoor pole-mounted luminaires that meet design standards for traditional and contemporary environments. Sternberg uses the latest in solid-state technology in its products. Sternberg Lighting serves the municipal, landscape, higher education, and commercial markets, providing efficient and cost-effective lighting solutions to the outdoor market. Since 1923, Sternberg has maintained its position as a leader in the street-lighting industry by utilizing the latest technological advancements.
Structura creates poles, bollards, luminaires and furnishings in the heart of the U.S.A.—Kansas. Inspired by the beauty of light and the purpose of place, we bring new life to your project with designs that energize external settings. Every form elevates function; every design is deliberate, from material to color, texture to finish. Our employees drive Structura’s innovative spirit using advanced prototyping and manufacturing techniques. Our designs are crafted to withstand the test of time in every setting—indoor, outdoor and the spaces in between.

**PRODUCTS**
We are craftsmen. We’re innovators, designers and engineers. Whether it’s our wood or metal poles, bollards, luminaires or site amenities, our designs use aluminum, wood, weathered steel, and more. Visit structura.com to access/download our complete product catalog.

**PERFORMANCE**
We make some of the world’s most durable exterior products in wood (Accoya®), and back them with industry leading warranties. Accoya is the product of technology used to create a high-performance wood. It has been extensively researched and tested. To learn more about the performance of our products, please visit structura.com.

**SUSTAINABILITY**
It’s important to minimize our impact on the environment. By using Accoya® wood, we achieve that goal. Unlike most treated wood, Accoya does not include toxic chemicals, and can be safely reused or recycled. It uses naturally renewable and sustainable sources, and its materials are made from FSC, PEFC, and other regionally certified woods.
ABOUT
Unmei LEDs began in 2010 and has developed a full and varied line of high quality 316L stainless steel lights for underwater and inground installations. Located in Canada, we distribute internationally through our dealer network. Our UL listed lights and niches are certified for fountains, swimming pools and spas. Optional cable lengths, lens degrees, and other minor custom requests make it easy to specify our products. Consider whites, colors, RGB-DMX and RGBW.

PRODUCTS
Our lights range from 5 watts to 104 watts, with our low voltage up to 54 watts certified for installation in or out of water. Our 120V LED lights in whites, RGB-DMX and RGBW are perfect for new installations or to retrofit existing fountains. We recently certified a submersible 316L stainless steel junction box.

PERFORMANCE
Unmei LEDs believes quality control is important. Our lights pass rigorous testing to ensure that each new order meets the high standard we have become known for. Our commitment to R&D ensures we provide the latest available technology combined with upgrades as new products are developed.

SUSTAINABILITY
Stainless steel is 100% recyclable and typically can meet the lifetime requirements of a project. Its usage contributes to LEED certification, which increases the value of a project. This combined with the fact that all our lights have replaceable LEDs makes our lights a logical choice.
ABOUT
Bison Innovative Products offers the design flexibility to create versatile, unique outdoor spaces. Since 1994, Bison has led the industry in the design and manufacture of pedestals and hardwood deck tiles that create beautiful rooftop environments. This independently tested, modular pedestal deck system allows rooftop decks to be installed quickly and easily without damaging expensive roofing systems. Bison Cubes are designed to integrate with Bison Deck Systems, giving the designer complete design flexibility.

PRODUCTS
Manufactured in the USA with 20% post-industrial recycled materials, Bison Pedestals create level decks over sloped surfaces. Bison Pedestals elevate and support wood tiles, pavers, site furnishings, and a variety of other surfaces.

Bison Pedestals are 100% recyclable made with high-density polypropylene plastic. Bison Wood Tiles are harvested in an environmentally responsible method designed to preserve the economic viability of rainforest hardwoods. Bison Cubes are made in the USA, can contribute to LEED points, typically contain 20% recycled content, and are 100% recyclable.

PERFORMANCE
Rooftop decks create valuable living square footage for both building owner and user. Using a Bison Adjustable Pedestal System to cover the waterproofing membrane does not require any roof penetration and will protect it from both damage and solar degradation. Pedestals elevate and support wood tiles, pavers, planters made from aluminum or Ipe and come in an array of colors and sizes.

SUSTAINABILITY
Bison Pedestals are 100% recyclable made with high-density polypropylene plastic. Bison Wood Tiles are harvested in an environmentally responsible method designed to preserve the economic viability of rainforest hardwoods. Bison Cubes are made in the USA, can contribute to LEED points, typically contain 20% recycled content, and are 100% recyclable.
ABOUT
Permaloc Corporation is the world's leading manufacturer of high-performance landscape edging and restraint systems. For more than 30 years, Permaloc has remained at the forefront of the industry by providing unmatched quality, breakthrough products, and world-class customer service. The company takes pride in its ability to lead the industry in new product releases, basing those designs on a constant, ongoing conversation with the leading landscape architects, designers, and contractors practicing around the world.

PRODUCTS
Permaloc utilizes its deep-rooted knowledge of the landscaping industry, mixes it with solid manufacturing principles, and creates edging and restraint systems known worldwide as application-driven, performance-based products that provide a quick and easy installation while offering the highest level of visual aesthetics.

PERFORMANCE
Permaloc's quality edging and restraint systems are engineered to last the lifetime of the project. Our high-quality aluminum products will not rust, rot or break down in the landscape, and will hold up against the demands of professional maintenance equipment.

SUSTAINABILITY
Permaloc Corporation has dedicated itself to creating products that are environmentally friendly and beneficial to sustainable design. Our LEED® approved products utilize post-consumer recycled material, and each product is 100% recyclable. Each product is designed and engineered to last the lifetime of a project, adding to the sustainable benefits.
ABOUT
Sure-loc Edging manufactures and supplies a full line of professional-grade landscape and hardscape edging, including aluminum, steel and plastic edging, and aluminum or plastic paver restraints. Our products are made in the USA from recycled material. Our aluminum edging features a dual-stake locking system with seamless connections and end stake adapters, which allow for stakes at any point. Our material installs with ease, requires minimal maintenance, and lasts a lifetime.

PRODUCTS
- Crisp Edge 1/8” aluminum edging
- Sure-Edge 3/16” aluminum edging
- E-Z Edge 1/8” aluminum edging
- 14 gauge steel edging
- 1/8” steel edging
- 3/16” steel edging
- 1/4” steel edging
- Elite Edge plastic edging
- Edge-Flex plastic edging
- Hi-Test plastic edging
- Heavy duty or flexible plastic paver restraints
- Six varieties of aluminum paver restraints

PERFORMANCE
Our aluminum and steel products are manufactured in the USA from recycled materials and are recognized globally for our quality materials and unique features, ensuring lifetime performance.

SUSTAINABILITY
Sure-loc Aluminum Edging is non-toxic, made from recycled material with excellent corrosion resistance and high thermal conductivity. It will not rust, rot, or become brittle. Lifetime performance and environmental safety are ensured.

Our edging installs with ease without overlapping joints due to our dual-stake locking system and has end stake adapters that allow for staking at any point.
ABOUT
TigerDeck is a unique hardwood decking system. With Black Talon universal hidden fasteners you have a beautiful, easy-to-install, durable, and low-maintenance deck without surface penetrations. TigerDeck will last 2–3 times longer than softwood alternatives, is naturally resistant to rot and insect damage, and is processed and graded in the USA to ensure consistent quality. TigerDeck stands behind all its products with a 25-year limited warranty.

PRODUCTS
• Decking & deck components
• Deck tiles
• Flooring/porch
• Siding/rain screen
• Paneling
• Special order products

PERFORMANCE
TigerDeck® is kiln dried (8%) to minimize shrinkage and maximize stability and performance. It is comparable in strength and durability to Ipe, yet finishes smoother with no raised grain issues. The BlackTalon® hidden fastening system complements the profile design of deck boards to minimize surface penetrations while firmly holding deck boards.

SUSTAINABILITY
Astronium Spp is one of the most common and fast-growing species found from southern Mexico to Argentina and is harvested from sustainable forestry operations. It is available as FSC® certified, and TigerDeck® has chain of custody certification.

ABOUT
Since 1954, Wickcraft has been standing behind what we make, how we make it, and the products from other manufacturers that are used in the process to deliver you a lifetime warranty. Wickcraft Boardwalks are constructed from tubular structural steel (HSS) that is hot-dip galvanized in the post-fabrication phase. Our boardwalks are so strong, we guarantee them for 100 years and warranty our workmanship for life.

PRODUCTS
Wickcraft Boardwalks are all pre-engineered and prefabricated. All material arrives on-site ready to install by either a general contractor or maintenance crew of three. All products are built to the International Building Code (IBC) standards and all steel fabrication is done by American Welding Society (AWS) certified welders.

PERFORMANCE
Wickcraft is a pioneer in boardwalk design and improvement. The simple and original design of a Wickcraft Boardwalk allows for easy installation with minimal equipment. Additionally, progressive innovations such as Posi-Loc® and Posi-Trus® deliver unmatched security and support for your boardwalk project.

SUSTAINABILITY
Wickcraft works closely with designers, architects, contractors, and installers to ensure your project expectations are met and done so in an environmentally sustainable manner. The culmination of our partnership includes fabrication, installation, inspection, and verification, giving property managers peace of mind for years to come.
ABOUT
Since 1998, Solus Decor has been all about designing, casting, assembling, and shipping concrete products from Vancouver, BC, Canada. These products include fire pits, fireplace surrounds, tiles and water features. Our products are built to withstand the extreme temperatures that the Canadian climate can produce. Today, our team produces beautiful, long-lasting objects that run counter to a culture obsessed with trends and disposability, much like concrete itself.

PRODUCTS
Solus Decor designs and produces high performance fire pits, fire tables, and water features and this year Solus Decor has launched its first combined fire and water feature: The Pacific Rim. The Pacific Rim combines the calming nature of a water feature with the warmth and ambient glow of a fire pit, the best of both worlds.

PERFORMANCE
Solus Decor fire pits are made from high performance concrete, which is designed to withstand the outdoor elements. We design and build our fire pits in-house to ensure all aspects of the quality from start to finish with the best warranties in the business.

SUSTAINABILITY
At Solus Decor our purpose is to create enduring designs that will bring a lifetime of enjoyment and function. In our production practices we strive for a small footprint, recycling and reusing where possible, using certified lumber and recycled form materials and drawing the bulk of our energy from human power.

ABOUT
For more than 21 years, Westminster Teak has been the embodiment of the finest in teak furniture for its design, materials, and craftsmanship. Our unrelenting commitment to quality and passion for timeless design has been the narrative and hallmark driving the company forward. Today, our furniture is seen in some of the finest hotels, resorts, private clubs, and residences throughout the world, including Camp David.

PRODUCTS
Design plays a fundamental part in the philosophy and narrative of our company. While retaining a select few from the “old classics,” our design team is constantly working to create furniture that evokes simple sophistication and casual elegance. Our furniture designs are as timeless and enduring as the teak wood from which they are made.

PERFORMANCE
Every piece of our furniture is made by employees skilled in their craft and trained to meet international industry standards. Apart from being rated best overall for quality and service by The Wall Street Journal, we’ve furnished some of the most well-known hotels, resorts, museums, and private clubs in the world.

SUSTAINABILITY
All the teak used in the manufacturing of our furniture is from sustainably harvested plantations under the strict management of the Indonesian Ministry of Forestry. Today, we only use SVLK- and FSC-certified lumber in the manufacturing of our furniture, ensuring transparency and that the wood we use can always be traced back to its origin.
ABOUT
Originality, craftsmanship, and high play value—these are the hallmarks of equipment by Richter Spielgeräte GmbH. For more than 50 years, the family-owned company has followed the principle, “As much play value as possible, as much safety as necessary,” to challenge children and inspire self-determined play. As Richter’s exclusive U.S. partner, APE Studio works with landscape architects and planners to develop some of the country’s most beloved and acclaimed play spaces—including Tulsa’s Gathering Place, the nation’s largest public playground.

PRODUCTS
Richter offers compelling play for every age, from young children to teens and families playing together. Original products include a full range of play types, with many designs made expressly for Richter by working artists. Climbing structures, play towers, rope bridges, water play and sensory elements are Richter’s most distinctive product lines.

PERFORMANCE
Attention to design and materiality give Richter’s play equipment an outstanding level of play value. That means that people really use our equipment and return to our playgrounds again and again. Simple, sturdy construction and materials make Richter products stand out in urban playgrounds and complement park settings.

SUSTAINABILITY
In developing play offers, Richter is guided by play value, then by safety, stability, ease of maintenance, and concern for the natural environment. Since its founding in 1967, the Richter company has committed to work in an environmentally friendly way. To this end, Richter uses untreated larch, robinia, and oak harvested from certified forests.
ABOUT
Play That Moves You means observing, researching, innovating and designing products and playspaces that inspire everyone to find the best of themselves through play. We’ve been creating play for almost 100 years and continue to bring the best and most innovative products to communities around the world. Creating environments for children and communities to move and develop socially, emotionally, physically and cognitively is a privilege for us now and into the future. We are almost a century old, but we’re just getting started.

PRODUCTS
Bringing Play That Moves You to communities around the world means we are focused on being the best in the industry by offering products that marry form and function and bring everyone together in play, recreation and outdoor fitness. We research how children play and engage with their environments to ensure that they are getting the highest level of play and development. We create products that offer people of all ages and all abilities the opportunity for connection and enjoyment. We work to create an element of excitement over and over again so children can experience the joy of discovery each time they play.

PERFORMANCE
Burke’s playgrounds are handcrafted in our Midwestern facility using high-quality materials, including compounded plastics with UV-16 to protect your investment. Burke’s exclusive KoreKonnect® direct-bolt clamp system is the very best in the industry and our EZKonnect® system features a self-leveling platform design. Together they offer ease of installation and a clean look that invites everyone in to play.

SUSTAINABILITY
Burke’s commitment to a sustainable future is demonstrated by our ISO 14001:2015 certification and environmental programs. Additionally, 100% of our factory’s electricity comes from wind and other renewable sources. Burke is the only major playground manufacturer that has earned the green power partner designation from the U.S. Environmental Protection Agency.
ABOUT
Founded in 1865 as a company producing steel cables for the elevator industry, in 1971 Berliner was the first company ever to develop commercial playground equipment based on steel-reinforced ropes. In more than 45 years, Berliner has established its name as the world’s leading manufacturer of net climbers. The North American headquarters are based out of Greenville, South Carolina.

PRODUCTS
The innovation and uniqueness of Berliner’s living playgrounds ensure interactive, challenging, and invaluable fun for kids of all ages. Climbing, swinging, and balancing encourages agility, coordination, strength, and achievement in a playful environment.

PERFORMANCE
For almost a century, Berliner products have been established in many playgrounds around the world. The state-of-the-art technology and patented designs provide equipment that is built to last for generations. With decades of experience in the playground equipment industry, combined with extensive rope manufacturing knowledge, Berliner has designed a variety of products for unique playground landscapes that comply with safety standards. Berliner has been awarded several prizes for equipment design and functionality.

SUSTAINABILITY
To achieve an optimum of sustainability, Berliner playgrounds are long-lasting investments. Berliner production has been PVC-free for more than a decade, and more than 90 percent of the products and materials are recyclable. The ropes are galvanized steel cable wrapped in a polyester yarn, and manufactured using materials with proven durability under extreme weather conditions and high play frequency. All products meet and exceed the limitations for lead in paint, and lead in substrate and in phthalates, to help protect both children and the environment.
Earthscape designs and builds innovative custom destination playgrounds that open children’s imaginations, stimulate their creativity and challenge their motor development. We approach design collaboratively working alongside landscape architects and municipalities. Our multidisciplinary team crafts unique wood playgrounds that create a sense of place. Our designs are fabricated at our shop in Ontario, Canada, and shipped around the world.

PRODUCTS
Earthscape playgrounds reflect themes that speak to the history or character of a neighborhood. Using three technologies—sculpture, towers, and log climbers—a story is told through the equipment. Our ideation process that begins with loose hand sketches allows us to create mind-blowing gathering places that are iconic hubs of activity.

PERFORMANCE
Playgrounds should be magical places for all children. Earthscape designs opportunities for graduated challenge that are physically and mentally engaging so that children test their boundaries and push their limits with every visit. Our wood playgrounds are constructed for longevity and each piece is engineered to withstand generations of use.

SUSTAINABILITY
Wood is the primary material used in our playgrounds and is a renewable resource. The woods we use are not highly processed, saving energy and minimizing waste. Eventually, our woods will naturally and safely decompose. We source our timber from known suppliers and from as close as possible to our facility.
ABOUT
Greenfields Outdoor Fitness provides unique outdoor fitness settings that offer a myriad of activities for users at all fitness levels. Embraced nationwide for its high quality and multi-generational appeal, the equipment provides a fun, socially oriented style of fitness and is the number-one amenity for the community. Greenfields Outdoor Fitness equipment is perfect for parks, senior centers, schools, universities, and virtually any greenspace. Communities love inclusive social outdoor fitness!

PRODUCTS
Greenfields is the complete solution for any community. Greenfields’ Signature Accessible line makes the outdoor gym available to users in wheelchairs, and the Professional Series offers adjustable resistance for a customized workout. Greenfields’ Functional Fitness units offer advanced training, while our military line is found at bases worldwide.

PERFORMANCE
Greenfields’ equipment has been tested in environments from inner-city neighborhoods to intense northern climates. The durability of the equipment is a testament to its rugged construction, as it is designed to handle years of continuous use by the unsupervised public.

SUSTAINABILITY
By providing communities with free, human-powered fitness options, Greenfields is working toward a sustainable future.
ABOUT
Since 1971, Landscape Structures has been the leading manufacturer of commercial playground equipment in the world. Our employee-owned company designs community and school playgrounds that encourage kids of all ages and abilities to learn persistence, leadership, competition, bravery, support, and empathy through play. We push the limits of design, inclusion, and play to help kids realize there is no limit to what they can do today and in the future. For a better tomorrow, we play today.

PRODUCTS
From traditional to signature, Landscape Structures creates playgrounds that attract visitors from afar. Innovative playground products, custom designs, and SkyWays® shade systems deliver a visually appealing look, and, when added to designs, create playgrounds that become artful and iconic spaces.

PERFORMANCE
Landscape Structures ensures consistency, safety, and durability in every playground product that leaves its doors. The company’s goal is that every piece of equipment is built to last through this generation of children and on to the next. Landscape Structures’ precision manufacturing means safe and high-quality equipment built to last for years.

SUSTAINABILITY
Since Landscape Structures opened its doors in 1971, it has focused on creating inspiring play experiences while honoring the environment. Through the company’s culture of lean manufacturing, its employee owners are committed to manufacturing high-quality, sustainable playground products that last for generations.
PARKS AND RECREATION

ABOUT
PRZ stands for Prescription Root Zone. PRZ Sports Turf Consulting tests the soils on high use sports fields for stability, soil chemistry, soil microbiology, turf wear tolerance, drainage and sustainability.

PRODUCTS
- Design Services: Engineering soils
- PRZ Seminars: 15-25 seminars annually in U.S. on turf maintenance and sustainability.
- Reveals project needs for PRZ and Landscape Architect Services
- Assessment Services: PRZ engineers assess athletic fields and parks and recommend needed maintenance practices, materials and equipment for sustainability.
- Maintenance calendar customized for each site.

PERFORMANCE
- PRZ is brought in under a landscape architect at the request of a city, school district or university to ensure that the athletic fields are built properly and for sustainability.
- PRZ visits each site and does a thorough evaluation.
- PRZ writes tight specifications, customized for each site, based on its projected wear and specific micro climate!
- PRZ writes plans to amend poor soils—new or renovated.

SUSTAINABILITY
- PRZ specifies proper renovation of old, existing sites or new poorly built fields.
- The PRZ maintenance manuals list exactly what it will take to maintain each site, including maintenance tasks, proper nutrients and the timing for each.
- PRZ specifies organic biostimulants and amendments to prevent disease and pests from harming healthy turf.
- PRZ specifies long term fertigation/fertilization plans and rest periods for all fields.
ABOUT
Schoolscapes manufactures and distributes its own range of playground equipment throughout the USA and Canada. Schoolscapes also distributes other specialist brands, such as outdoor musical instruments from the Percussion Play range. The product design team includes teachers and child development professionals to ensure that children using Schoolscapes products enhance their learning as they play. Landscape Architects and other professionals can specify customized and site-specific products to create a unique sense of place in a Schoolscapes playground.

PRODUCTS
Schoolscapes GameTop Picnic Tables and Outdoor Musical Instruments can be enjoyed by people of any age and many have been supplied to elder communities, libraries, museums and parks. Many Schoolscapes products, such as the Little Movers range, are designed for Pre-K, Kindergarten and Elementary school age children.

PERFORMANCE
Schoolscapes has been producing playground equipment since 1996 and there are installations in varied climate zones throughout the USA, Canada and the rest of the world. Eco-Safe laminated FSC pine is used for structural components because of its strength and sustainability. Any steel or HDPE components are safe and 100% recyclable.

SUSTAINABILITY
Schoolscapes is accredited with international ISO 14001—an annual end-to-end certification process that ensures the sustainability and low environmental impact of all its business practices and products.
ABOUT
Acker-Stone continues to lead the industry with the development of new and enduring paving stones. Our long history of design and engineering excellence combines with your unique vision to build an inspired, welcoming personal retreat. We invite you to create enduring beauty with a level of quality and consistency you can depend on for years to come with Acker-Stone paving stones.

PRODUCTS
- Pavers: Aviano, Paseo, Combo Classic, Holland, Siena & more
- Permeable pavers: 4x12 AquaLiña, Aqua-Via I, Aqua-Via II, & Aqua-Via Trio
- Linear: 3x9, 3x18, 3x24, 4x12, 4x16, 4x20, 4x24, 6x24, & 6x30
- Slabs: Aviano Grande, Paseo Grande, Lido Stone, 8x16, 12x24, 15x25, 15x30, 16.5x25, & 24x24
- Palazzo: 12x12, 12x24, 26x24 & Palazzo Bullnose

SUSTAINABILITY
Permeable pavers represent the best management practices for controlling stormwater runoff. Our Aqua-Via Series & 4x12 AquaLiña are an environmentally friendly permeable paver system that allows rainwater runoff to drain back into the soil naturally, filtering pollutants while replenishing groundwater reserves.
ABOUT
Archatrak is a national supplier of exterior porcelain pavers, structural and interlocking wood deck tiles, deck support systems and porcelain outdoor furniture. Whether it’s elevated rooftop decks on pedestals, on-grade paving over sand or gravel, resurfacing of existing concrete, or mortar set paving for vehicular applications, our range of products will give you the opportunity to create exceptional outdoor patios, courtyards, rooftop decks, terraces, balconies and green roofs with truly unique character and lasting appeal.

PRODUCTS
• Porcelain pavers and planks, available in 50+ colors and 3/4” or 11/8” thickness
• Porcelain cobblestones, available as tiles, pavers and 2-1/2” thick blocks
• Interlocking and structural wood tiles made from Ipe and Black Locust wood
• Self-leveling, height-adjustable decking support pedestals
• Outdoor furniture and accessories, including modular planters and porcelain tables, benches and seats
• “StreetDeck” modular decks and parklets

PERFORMANCE
Our range of porcelain products are scratch, stain, slip and mold/mildew resistant, as well as fire- and frost-proof. With their exceptional strength and load-bearing capacity, porcelain pavers can be used not only for on-grade applications, but also for pedestal supported elevated decks, with their light weight making for easy transportation, delivery and installation.

SUSTAINABILITY
By its very nature, porcelain is a sustainable material as it is made from plentiful, naturally occurring substances, clay and water. Porcelain pavers can be completely recycled into building materials such as cement, brick, or artistic tile mosaics. Porcelain pavers are VOC-free, and contain no sealants, waxes, or other chemicals.
ABOUT
Hanover® Architectural Products strives to provide the highest quality concrete paving materials in the industry. Since 1971, Hanover® has participated in the development of unit pavers, as they became an integral part of architectural design. From small hand-held brick to larger scaled pavers, no other company can offer the complete selection of pavers, bricks and walling that Hanover® can. Hanover’s reputation stands strong with superior quality products and exceptional customer service.

PRODUCTS
• Prest® pavers on-grade
• Roof and plaza pavers
• Granite pavers
• Porcelain pavers
• Permeable paving units
• Prest® brick

• Asphalt block
• RockCurb®
• Garden and landscape walls
• Reconstructed stone wall panels

PERFORMANCE
Hanover® manufactures high quality products that perform to required specifications. High compressive strength and density give Hanover’s products the durability and low water absorption of natural stone.

SUSTAINABILITY
In response to the increasing demand for environmentally friendly products, Hanover® provides several product lines with environmental benefits—permeable pavers, green roof pavers, pavers with recycled content and asphalt block with recycled content. Hanover® products facilitate the process of earning SS credits and obtaining LEED Certification.
Invisible Structures is a manufacturer of grass and gravel porous paving, stormwater storage, erosion control systems, portable boardwalk systems and drainage systems. We offer solutions that effectively filter pollutants and reduce runoff volumes, providing surfacing and stormwater solutions that protect and enhance the environment. Available in custom colors, products are made from recycled materials and are ADA compliant.

**Products**
- Grasspave2 – grass porous paving
- Gravelpave2 – gravel porous paving
- Rainstore3 – underground stormwater storage for detention, retention and harvesting
- Draincore2 – geocomposite drainage layer
- Slopetame2 – erosion control system
- Beachrings2 – portable boardwalk system
- Terratame2 – ground reinforcement mesh

**Performance**
- 15,940 psi compressive strength, ADA compliant (Gravelpave2 and Grasspave2)
- H-20 bridge loading 9496 void space, stackable to 7.9 ft. (Rainstore3)
- 42 gallon per minute per foot width (Draincore2)
- 1-to-1 slope use and connecting rolls (Slopetame2)
- Flexible and reusable (Beachrings2)

**Sustainability**
- Naturally filters automobile emissions
- Reduces stormwater runoff
- Creates air-conditioning effect (Grasspave2)
- Reduces non-point source pollution
- Captures airborne pollutants (Gravelpave2)
- Allows tree growth within parking lots
- Reduces erosion and soil migration
- Made from recycled plastic

ABOUT
Kafka Granite has been an expert in specialty crushed stone products for nearly 40 years. Their 60+ colors of crushed granite, marble, quartz, and recycled materials are used for countless architectural and landscaping applications. In 2018, Kafka Granite introduced their new line of Specialty Building Stone. Kafka’s new quartzite, granite, and marble thin and full veneer are high-end and unique alternatives to the standard masonry stone products on the market today.

PRODUCTS
• Natural masonry stone handcrafted from granite, quartz, and marble offers unique and high-end alternatives to current offerings.
• Kafka’s famous pathway materials are used where a firm pathway is required, but a natural look, unlike hardscape surfaces, is preferred.
• 60+ colors of specialty aggregates are produced for a variety of applications.

PERFORMANCE
When partnering with Kafka, you receive a quarry-direct relationship. We monitor quality from the sourcing of the stone all the way through the manufacturing process. Every effort is made to ensure a clean, consistent product is delivered to our customers.

SUSTAINABILITY
Kafka Granite offers a broad portfolio of green solutions such as organic stabilized decomposed granite and recycled crushed aggregates. Furthermore, with the addition of our new masonry stone division, we’ve adopted a zero waste policy. Unlike most stone fabricators, all of our waste is able to be crushed for usable product.
ABOUT
Since the 1980s, we have set the standard for excellence and innovation in the industry. Keystone Hardscapes is a new brand with a line of pavers, retaining walls, and outdoor living elements built on a dedication to unrivaled product selection, quality, performance, and customer service. These products are favorites of homeowners, designers, contractors, and developers alike. We help bring landscape visions to life with both classic-style and unique textures, colors, and designs. Look to us to create or transform residential or commercial property projects.

PRODUCTS
Our portfolio contains a complete hardscapes solution: standard and permeable pavers with durable and stylish design options; retaining and freestanding wall systems for landscape and structural applications for commercial, municipal, industrial, transportation, and residential; and outdoor living design elements such as fireplaces and kitchens.

PERFORMANCE
For more than 30 years, Keystone segmental retaining wall and paving solutions have been trusted by design and contractor professionals. Our success can be attributed to our industry-leading engineering and technical resources along with an unflagging commitment to develop innovative products that are attractive, cost-effective, and durable.

SUSTAINABILITY
Keystone is an environmentally conscious company committed to products that respond to green building/construction needs. Many of these solutions count toward the USGBC’s LEED Green Building Product Rating System. We also have a broad selection of permeable pavers that help control stormwater at the source, reduce runoff, and improve water quality.
ABOUT
Being a family-owned business since 1923 and now in its 5th generation of family management, Nitterhouse Masonry Products understands how important each and every project is. Nitterhouse has been proudly producing quality concrete products for decades and continues its dedication to the highest standards of the manufacturing process while exceeding customers’ needs in projects of all sizes from pavers to block. Their continuous pursuit of creative, unique, and cutting-edge products sets Nitterhouse apart in the concrete industry.

PRODUCTS
- Architectural pavers
- Camina Pavers – linear design
- Urban Stone – plank-style pavers up to 36” lengths
- Aqua Pave paving stones
- Roof Ballast pavers
- Turfstone pavers
- Site amenities – planters, waste containers, bollards

PERFORMANCE
All of Nitterhouse's architectural pavers are manufactured at 8500psi, have a less than 5% absorption rate, and less than 1% weight loss in freeze-thaw resilience. The beauty and durability of Nitterhouse pavers are derived from the natural aggregates used in the manufacturing of them and are seen in the finish.

SUSTAINABILITY
Nitterhouse strives to produce products that are environmentally friendly, including their permeable pavers and other products that contain certain percentages of recycled block. It is a company-wide standard of reducing waste throughout our production process. Nitterhouse also has a goal to help assist in projects earning LEED certification.
ABOUT
At ORIJIN STONE, we collaborate with landscape architects and designers to find the most appropriate and exceptional stone for their unique projects. Our premium stone is used for paving, custom landscape and architectural features, sculpture, veneer, retaining walls and more. Our experienced team of stone experts—in product selection, design, technical assistance and fabrication—specialize in inspiring top-tier projects that require the finest materials, dedicated detail management, and superior craftsmanship.

PRODUCTS
ORIJIN’s all natural, supremely durable and handcrafted stone products come in a variety of stone types, colors, textures, and finishes. Products include:
• Patterned paving stone
• Wallstone
• Steps and treads
• Coping, cap stones & sills
• Veneer stone
• Interior tile
• Custom and exclusive stone options for all exterior and interior applications

PERFORMANCE
Our offerings include the highest quality natural stone products you will find. We source stone from around the world—managing quality from the quarry to the packaged product. Our exceptional stone selections are comprised solely of proven and tested products to withstand the effects of harsh freeze/thaw climates.

SUSTAINABILITY
We only partner with stone sources that are environmentally responsible and capable of providing premium stone. Our waste product is recycled, as is the water used in our in-house fabrication facility. Produced without the use of manmade chemicals, binders or dyes, stone is nature’s strongest and longest-lasting building material.
ABOUT
Soil Retention has been manufacturing and distributing Plantable concrete systems® utilized by architects, landscape architects, developers, contractors and engineers since 1987. The company’s line of Plantable concrete systems® consisting of DRIVABLE GRASS®, VERDURA®, and ENVIROFLEX®, offer solutions for projects requiring high standards for strength, durability, design and performance. Award-winning projects, like the Sanford Consortium for Regenerative Medicine in La Jolla, the Charmer in San Diego, and Lambert Ranch in Irvine, used its products.

PRODUCTS
DRIVABLE GRASS® is a permeable, flexible and plantable concrete pavement system that can be used for several applications that offers different planted and non-planted infill options. DRIVABLE TURF® is a pre-cut artificial turf infill option. VERDURA is a fully plantable retaining wall system. ENVIROFLEX® is a plantable ACB revetment system.

PERFORMANCE
Soil Retention has been installing VERDURA® retaining walls in AZ, CA and NV for 30 years without a failure! Built to last, DRIVABLE GRASS® offers the same strength and durability as conventional pavers, but can be used for a broad variety of applications, including fire lanes, parking areas, emergency access lanes, roadside shoulders, swales, etc.

SUSTAINABILITY
Soil Retention’s products can integrate the built environment into the natural ecology of the land and/or watershed by using conservation-based techniques including stormwater containment, biofiltration, infiltration, and storage; offering opportunities for low-impact development, LEED® credits and potential point contributions.
ABOUT

Founded in 1986, Superior Concrete Products engineers, manufactures, and installs modular precast concrete walls, fences, structures, and other barrier systems for utility substations, residential developments, golf courses, and the farming/ranching industries throughout North America. The company also has installations abroad and licenses precast mold products and services in countries around the globe. Most recently, the company has started constructing precast concrete buildings of all sizes and tiny homes. Certified by the National Precast Concrete Association, the company is headquartered in Euless, Texas. For more information, go to www.ConcreteFence.com.
ABOUT
Carderock Stone is a mica-schist quartzite building stone quarried by Tri-State Stone & Building Supply, Inc. from the same location since 1926. Its unique seam structure allows it to be worked into many different installation styles. The vibrant blues, browns, grays, and greens create an aesthetically pleasing color palette. The unique color range, durability, and ease of use have made Carderock Stone a favorite of architects, designers, masons, and homeowners for generations.

PRODUCTS
Carderock Stone is available in two stacking wallstone grades, three full thickness veneers including a sawn ashlar, three thin veneers, a tumbled landscape grade, a landscape aggregate, steppers, and landscape boulders. Tri-State Stone & Building Supply, Inc. is also a full-service stone dealer with more than 100 other types of stone.

PERFORMANCE
Carderock Stone is a durable, as well as beautiful, building stone. There are no freeze/thaw concerns. Its many grades and workability allow its incorporation into any design from rustic to formal. Any project will benefit from the incorporation of Carderock Stone.

SUSTAINABILITY
Natural stone is the best building material available. It never needs painting or replacement. It is the only building material that gets more beautiful with age. It can be reclaimed and reused. Nothing evokes a sense of classic style and permanence like natural stone—Carderock Stone.
ABOUT
Designers and architects trust Unilock to bring their vision to life. Unilock introduced pavers to North America and continues to be the style and trend leader in the hardscape industry. The Unilock palette of exclusive textures, colors, styles, and wide array of customizable solutions will allow you to showcase your creativity. Combined with the most advanced manufacturing technologies in the industry, delivering exceptional strength, beauty, and resilience, you are assured that your projects will look great for years to come.

PRODUCTS
The extensive Unilock collection of sizes, shapes, unique textures, and color options offers endless design solutions for your projects. From traditional unit paving to linear planks and large format pavers for heavy-duty, traditional, and permeable applications, retaining walls, and garden walls, there is a product for every situation and aesthetic.

PERFORMANCE
Unilock has the most advanced manufacturing technologies in the industry. Our EnduraColor™ products promise long-lasting beauty through a proprietary blend of exclusive and superior ingredients, creating ultra-realistic surface textures and unique style options that are exceptionally durable. It sets the new standard for everlasting beauty.

SUSTAINABILITY
More than 25 years ago, Unilock introduced the first permeable unit paver to North America and now has an extensive collection of styles, sizes, colors, and architectural finishes available. Our permeable pavers are self-aligning, structural unit pavers with joint spacing that is ADA compliant, ensuring you can design without compromise.
ABOUT
At Wausau Tile, we help the world's leading architects and designers bring their unique visions to life. Showcased around the globe, our cutting-edge products have been made in America for more than six decades. That time-honored work established a commitment to quality and craftsmanship that lives on today in everything we do, as each product is made by skilled craftsmen at our facilities in the heart of the Midwest with the same impeccable quality, turning big ideas into beautiful spaces.

PRODUCTS
Wausau Tile's architectural pavers are manufactured to unprecedented strengths and offer endless size and color customization. Site furnishings bring modern, mixed-material style to the often overlooked, functional pieces every project demands. Our custom precast concrete capabilities defy convention and command attention. The perfect solution for everything from floors to countertops and wall treatments to stairs—our custom precast terrazzo will breathe new life into any project.

PERFORMANCE
All of Wausau Tile's products are crafted to meet the industry's most stringent manufacturing standards and deliver long-lasting reliability. Our unwavering commitment to quality, attention to detail and strength—trusted by the U.S. State Department, military bases, and professional sports facilities—provides performance that stands the test of time.

SUSTAINABILITY
We cut down on waste by using millions of pounds of recycled materials—such as glass and porcelain aggregates, plastic and rubber components—and avoid sending millions of pounds of waste to landfills each year through innovative processes that reuse plastic, cardboard, paper, aluminum, packaging foam, wood pallets, and more.
Bromsgrove Garden Ornaments Inc.  
394 Sherman Avenue North  
Hamilton 1  
Canada

T: 905-312-9830  
info@bromsgrovegarden.com  
www.bromsgrovegarden.com

ABOUT
Bromsgrove Garden designs and fabricates lead planters, urns, cisterns and other accessories including spouts and escutcheons. Our designs are inspired by traditional English patterns and modern innovators in landscape design. Embraced by professional landscape designers, our products have been incorporated into many of North America’s most elegant gardens.

PRODUCTS
We have a large stock of patterns for making urns, planters, cisterns, and accessories such as spouts, escutcheons and masks. We have extensive capabilities for producing custom designed planting vessels and cisterns. We can produce single planters up to 8’ in length.

PERFORMANCE
The material we use lasts forever. Lead baptismal Norman fonts can be found in England that date back to 1100 and are still in use today. Classical gardens throughout Europe dating back to the 1700s have lead garden ornaments and statuary that have survived for over 3 centuries. Age only works to improve the appearance of our products.

SUSTAINABILITY
Lead is the most recycled metal on the planet and it exists naturally in the earth. It will not rust, corrode, leach or deteriorate when exposed to the natural elements.
ABOUT
For over 30 years, Campania has offered landscape and design professionals an extensive collection of planters, fountains, and outdoor accents. Our exclusive line of cast stone products are manufactured with pride in the USA. We also source an exclusive range of planters and garden accents in a wide variety of traditional and lightweight materials. Our warehouse in Pennsylvania contains more than 2,000 product designs available, in stock, and ready to ship.

PRODUCTS
• High-density cast stone
  - Planters and pedestals
  - Fountains
  - Tables and benches
  - Birdbaths, statuary, and accents
• GFRC planters and fountains
• Glazed and terra-cotta pottery planters
• Lightweight planters
  - Lite® fiberglass composite
  - Zinc and steel planters
  - Glazed pottery fountains

PERFORMANCE
Campania’s products are well suited for commercial, hospitality, and residential projects.
• Our high-density cast stone is rated to 7,000 psi
• Our glazed and terra-cotta pottery is high fired up to 1,000 degrees centigrade, ensuring frost resistance and durability
• Our products are tested against freeze-thaw conditions to ensure durability

SUSTAINABILITY
Campania’s cast stone products are manufactured with locally sourced materials and can qualify for LEED® credits. Our planters are packaged with 95% recyclable material, including cardboard and 100% reusable natural wood excelsior.
ABOUT
Green Theory designs innovative products that create space and capture attention. We balance bold design with durable materials and eco-friendly finishes, creating functional, fashionable planters and modular planting systems that will stand up to the rigors of extreme weather.

PRODUCTS
Customization is key. Start with the basics: size, shape, material and color. Then adjust to what you need: drainage, trellis, lighting, speakers, kicks, shelves, benches, cladding, engraving—it’s all possible. Use JOIN for those grander landscaping plans, our bolt-together system of planters, edging and trays to create all kinds of configurations.

PERFORMANCE
Our custom planter design process is as smooth as our powder coats. We’ll assign one of our dedicated in-house reps to track your project from beginning to end. Thanks to proprietary software, we provide quotes in minutes, not days. Whether you’ve got a landscape draft ready or just a drawing on a napkin, contact us.

ABOUT
Greenform offers a cohesive line of planters and furnishings that enhance the spaces where people live, work and play. Crafted with a regard for the natural landscape, each piece features well-considered architectural form and a modern, European sensibility. Our products are manufactured in Switzerland, handmade by individual artisans. We take pride in being the sole provider of containers created from lightweight fiber cement. Noted for its natural, durable and recyclable traits, fiber cement is a truly enduring and versatile material.

PRODUCTS
We respect the purity of honest materials blended with authentic design. Each piece is hand-formed and signed by individual artisans in Switzerland. Well-known European designers Rainer Mutsch, Michel Bruggmann and Martin Mostboeck provide the basis for our line of award-winning designs.

PERFORMANCE
Fiber cement is a natural, lightweight material with all the benefits of durable concrete, and considerably less weight. Pieces are well suited for outdoors or indoors, at all temperatures (resisting heat, rain and snow). The material resists fading and is not harmed by decay, corrosion rust or salt water.

SUSTAINABILITY
We offer resilient solutions that stand the test of time and environmental responsibility. All of our pieces are fabricated in 100% recyclable material, using natural ingredients that include cement, powdered limestone, recycled cellulose fibers, air and water. We use low-VOC colorants and employ low-impact manufacturing practices.
ABOUT
All the way from concept to creation, Planters Unlimited provides commercial planters, hanging baskets, and other landscape solutions to fit your landscape projects in both aesthetics and functionality. Known for our custom manufacturing capabilities and the durable materials we use, we retain a regular client list that includes some of the world's best hotels, resorts, restaurants, theme parks, casinos, and retailers. For trade pricing and exclusive offers for trade professionals, contact us at 1-866-282-5705.

PRODUCTS
Our planter selection includes low and tall outdoor planters and custom sizes and styles made in your choice of fiberglass, stone, composite, wood, or stainless steel, with 25 colors and four finish options. Large, commercial hanging baskets, outdoor furniture and storage, and site amenities are also included in our range of customizable products.

PERFORMANCE
Made durable for use in high-traffic environments and extreme weather (including freeze/thaw conditions), our commercial planters and landscape products are built to last no matter where they’re placed.
ABOUT
As an industry leader of landscape products, Planterworx prides itself in our attention to detail and our commitment to creating beautiful, lasting objects.

PRODUCTS
Our challenge is to create products that are both visually desirable and technically durable. Many of our product examples are intended to serve as inspiration. We are capable of a simple selective change or an extensive modification. Tell us your requirements and we will do everything to fulfill them.

PERFORMANCE
All Planterworx products will be executed with our stringent commitment to timeless design and lasting quality, paying full attention to every last detail. Each product is made from the finest materials and is proudly designed and meticulously manufactured in Brooklyn, New York.
ABOUT
Successful sites start here! As a manufacturer of products for commercial landscapes for over 30 years, we have become the premier solution provider of products for rooftops, terraces, streetscapes, public institutions and hospitality projects nationwide. Tournesol makes a complete range of pots and planters, self-watering irrigation, site furnishings, and greenwalls, as well as turnkey commercial fountains and security planter barriers. With the material options we provide (Wood, FRP, Lightweight GFRC, Steel, Cast Iron, Weathering Steel), designers and contractors across the country can be inspired to dream big and we’ll work with your teams to build it. Whether your project requires standard or custom, large or small, find out why we say that “successful sites start here!”

PRODUCTS
• The widest range of commercial-quality lightweight pots, planters, hanging planters and planter screens
• Exterior and interior living wall and trellis systems
• Rooftop patio systems: adjustable paver pedestals, Boulevard thermally modified wood tiles and decking
• Site furnishings and bollards in a range of materials
• Turnkey fountains up to 40’ diameter

PERFORMANCE
Our project management capabilities have made us into the go-to large project provider in the industry. The Customworks program team includes extensive custom engineering support enabling our team to solve specifier’s problems with a range of innovative materials, creating complete solutions for roof decks, terraces and public spaces.

SUSTAINABILITY
Our Boulevard thermally modified wood offers the first real sustainable domestic alternative to imported Ipe and other South American hardwoods. Made from sustainable hardwoods, it offers durability, longevity (25+ years rot and decay resistance) that no other domestic hardwoods can offer.
**About**

Since 1997 Bio-Plex (a subsidiary of Turf Chem. Plus, Inc.) has been a leader and innovator in manufacture of eco-friendly, natural organic products that elevate and maintain high levels of turf and ornamental plant health prior to and throughout nursery harvest to site installation. Bio-Plex products are a great fit where sustainable bio-nutritional remediation solutions for both turf and ornamental transplantation success and establishment are primary mandates and objectives. Common eco-friendly ingredients include but are not limited to biochar, plant growth inducing rhizobacteria (PGIR), endo/ecto-mycorrhiza, compost, fish, seaweed, CDE, amino-humid-fulvic acids and more. In 2019, Bio-Plex introduced an amazing new proprietary biochar product formulation technology that homogenizes all ingredients into a charged “bio-prill” that helps ensure 100% of the product ingredient composition is evenly delivered in 100% of the targeted particle distribution area.

**Performance**

Bio-Plex Organics is a leading product formulator for sustainable bio-nutritional and transplant survival specialty products. The product portfolio ranges from sustainable, eco-friendly product choices for turf and ornamental landscape maintenance and installations, plant stress solutions, site and soil reclamation, biochar tees and greens soil amendments and much, much more. Some Bio-Plex biochar products are even labeled to prevent and remEDIATE soluble salt residues adversely affecting plant health that are caused as a result of applications of ice-melters in and around turf and ornamental landscape plantings. Bio-Plex Organics approaches product performance in a 360-degree global perspective that places equal importance in targeting the plant–soil–root–rhizosphere.
Century Products Inc.
1144 N Grove Street
Anaheim, CA 92806

T: 714-313-4500
tom@crbtools.com
www.centuryrootbarrier.com

AB O U T
Century Products proudly manufactures and distributes a wide variety of landscape products for the urban forest. We lead the way in hardscape protection by implementing the suggestions of architects into each of our products. Our company has a licensed contractor and certified arborist on staff to answer all of your questions. In doing so, we have improved upon features needed in the industry, as well as extended the lifetime of our products, to ensure maximum protection.

P R O D U C T S
Century has designed and patented the process to create our uniquely effective and long-lasting line of advanced root barrier rolls. Century manufactures the ONLY Dual Purpose Root and Water Barrier on the market. All of our products are approved by government and federal agencies nationwide and are always endorsed by our own ISA Arborist.

P E R F O R M A N C E
Century Products has become the leader in hardscape protection by providing the landscape industry with high-quality and durable products that not only meet, but EXCEED specifications. For nearly three decades, we have been manufacturing high-grade materials and to this day we ALWAYS keep our customers in mind.

S U S T A I N A B I L I T Y
Century Products changed the design of existing root barriers by creating a more functional, durable and cost-effective material known as high-density polyethylene. We are confident that choosing Century Products will result in communities around the world that are both aesthetically pleasing and safe for all who inhabit them.
ABOUT
At Citygreen, we love trees. In fact, we think they hold the key to better cities—and a better world. Informed by years of comprehensive research and development, our urban landscape solutions offer the very best in cutting-edge technical design. Our structural modules are proven to be the strongest and greenest in the market—made from 100% recycled plastic. Our goal is to have sustainable green space within reach of every person, every day.

PRODUCTS
Groundbreaking green infrastructure products for landscape architects, arboriculturists, urban foresters, urban planners, developers, engineers, and local government authorities. We specialize in a modular system that supports trafficable pavement loads to provide larger volumes of loan soil for healthy tree canopies in cities.

PERFORMANCE
Stratavault® and Stratacell® structural modules are the strongest available by a large factor, making them suitable for use under high-traffic areas, including areas frequented by heavy machinery such as excavation equipment and cranes.

SUSTAINABILITY
Stratavault® and Stratacell® structural modules are made from 100% recycled plastic. We take plastic waste, granulate it, formulate it to exacting standards, and injection mould it into the modules.
Ernst Conservation Seeds
8884 Mercer Pike
Meadville, PA 16335
T: 800-873-3321
F: 814-336-5191
sales@ernstseed.com
www.ernstseed.com

ABOUT
Founded in 1964, Ernst Conservation Seeds grows, processes, and sells more than 400 species of native and naturalized seeds and bioengineering materials for sustainable landscaping, ecological restoration, beautification, reclamation, conservation, and pollinator habitat. The company identifies, collects, and propagates new species and regional ecotypes that meet its clients’ unique needs, from eastern Canada to the southeastern United States.
**ABOUT**
- NATIONWIDE TREE RELOCATION/PRESERVATION SERVICES: Performed with care by 100% experienced full-time employees (no day laborers like our competition). Perfect on-the-job crane safety record since 1997.
- SPECIMEN TREE NURSERIES: In Los Angeles and Riverside, California, featuring unique, one-of-a-kind specimen trees 60” through 120” box wholesale to the trade.

**PRODUCTS**
- CURRENT GUINNESS WORLD RECORD HOLDER: Largest tree successfully moved in 2004 and thriving today.

**PERFORMANCE**
- EXPERTISE + CAPABILITY = VALUE: Successfully moving trees is part art, part science. Expertise earned over decades is made available to our clients in an instant. Applied with skill by long-term employees complemented by modern specialized equipment. Combine to produce superior quality and unparalleled success.

**SUSTAINABILITY**
A TRULY GREEN COMPANY SINCE 1997: Each year Senna Tree Company, with the support of our customers, saves hundreds of trees that otherwise would be destroyed. These are quality trees displaced by site development, all carefully selected, boxed and maintained at our nursery facilities until given new homes by our customers.

**CURRENT GUINNESS WORLD RECORD HOLDER:** Largest tree successfully moved in 2004 and thriving today.
ANOVA
211 N. Lindbergh Blvd.
St. Louis, MO 63141
T: 314-535-5005
rob@anovafulishings.com
www.anovafurnishings.com

ABOUT
Since 1970, ANOVA® has been a leader and innovator in site furnishings that enhance the beauty and comfort of public spaces. We were the first to introduce aggregate panels. In the 1990s, we patented coating technologies that yield superior performance and durability. Today, we continue to push the boundaries of design and manufacturing to create first-quality products that provide value to our customers and elevate the life of our communities. Anova creates first and lasting impressions, building places that engage, inspire, and will sustain over time.

PRODUCTS
Anova's portfolio of products spans modern, classic, traditional, and natural collections of benches, tables, trash receptacles, bike racks, and planters. You will find comfortable and ergonomic products in exciting new forms that blend beauty with industry-leading performance.

PERFORMANCE
Many Anova furnishings feature the patented Fusion Advantage™ technology for unsurpassed durability. This finish carries a 7-year warranty against rusting, fading, peeling, chipping, cracking, mold and mildew and a limited 20-year structural warranty.

SUSTAINABILITY
Public spaces are not just our business—they are our responsibility. Anova looks for new ways to meet and exceed our customers’ expectations for high quality, environmentally friendly products by:
- Adopting sustainable processes and materials, such as bamboo
- Utilizing recycled materials
- Offering items that contribute to LEED certification.
About
For 50+ years, Canterbury Designs has been designing and crafting inspired site furniture for customers around the world. Our site furnishings grace the landscapes of more than 10,000 projects located in parks, city streetscapes, and commercial developments from coast to coast. Sharp design is backed by rigorous fabrication standards to ensure that our site furnishings remain durable and vibrant long after the last anchor bolt is set.

Products
Canterbury offers an expansive portfolio of site furniture in classic and contemporary designs, including:
- Benches
- Tables and chairs
- Receptacles
- Tree grates
- Bollards
- Planters
- Bike racks

We also welcome the opportunity to fabricate custom amenities. Got a wild idea? We have the flexibility and capability to make your concept a reality.

Performance
Canterbury’s products are built to last. We make our site furnishings one at a time with premium materials to stand up against the toughest conditions in all climates. Each product is made to order and carefully inspected to make sure it meets our standards of excellence.

Sustainability
Canterbury is committed to making products that are beautiful, functional, and environmentally sound. All of our metal-based products—cast iron, aluminum, wrought steel—consist mostly of recycled materials. We continually search for alternative materials that improve our products and help us remain good stewards of the environment.
ABOUT
The “Playground Revolution” was initiated by TimberForm designs more than 50 years ago. Since its beginning, we have expanded our product selection to meet the needs of professional landscape architects. In addition to creative playground equipment, the company produces a selection of site furnishings in 20 design families plus bicycle security solutions and outdoor fitness systems. Online catalogs include bid document drawings and specifications. Call or e-mail the company’s design headquarters for help with unique solutions “For Signature Projects.”

PRODUCTS
The company produces a wide selection of steel, timber, and recycled plastic playground and outdoor fitness systems. Popular playground separates include long, one-piece, stainless-steel embankment slide chutes. Also offered are benches, litter containers, tables and chairs, as well as a wide selection of stylish bicycle racks and lockers. All site amenities can be specified with Buy America-compliant steel.

PERFORMANCE
Columbia Cascade products are designed to last. Schedule 40 steel pipe is standard, versus thin-walled tubing used by others. All metal is stainless steel or CASPAX-7 finished with lead-free powder coating. The tough, 6-mil coating offers lasting performance far superior to liquid finishes. All metal components are offered in more than 200 designer hues.

SUSTAINABILITY
Columbia Cascade has long been committed to manufacturing durable and beautiful eco-friendly products. Steel, aluminum and cast iron used contain 80–100% post-consumer recycled material. Plastic timbers are made from 100% post-consumer HDPE. Timber is obtained from North American sources that adhere to strict and ecologically sound sustained-yield practices.
ABOUT
CycleSafe provides engineered, innovative bicycle parking systems with installations throughout the world in the USA, Canada, Europe, and Australia. Since 1980, CycleSafe offers bicycle parking products that achieve the goals of transport and urban planners to satisfy the demands of architects and engineers by promoting active transportation. We serve planners for campuses, corporations, healthcare, municipal, government, and transit facilities with the most reliable and durable bicycle parking products to achieve healthy and sustainable communities.

PRODUCTS
Our palette of bicycle parking solutions include long-term and short-term solutions. Structural composite bicycle lockers provide long-term security, a full line of decorative bike racks offer short-term solutions, from classic to vintage or custom designs. Hi-Density bike racks meet the needs of bike rooms or bike stations.

PERFORMANCE
CycleSafe products are designed for extended product life, measured in decades, not years. Our products offer many custom options, from matching on-site finishes to products with graphic capabilities, such as incorporating logos or signage for wayfinding or promotional use. Pride in our products is demonstrated with our dedicated customer service.

SUSTAINABILITY
Made and sourced in the USA, CycleSafe has been committed to environmental sustainability for over 40 years. By providing high profile end-of-trip facilities, CycleSafe paves the way for transportation mode shift by promoting bicycle advocacy. Our products contribute to LEED certification. Contact us for updates to LEED v.4.

ABOUT
Rooftop planter specialist: creating built-in planters with an aluminum frame for a Lifetime-Structural-Warranty. DeepStream Designs’ American craftsmen create planters, screen walls, bins, benches, wall systems, custom hotel and restaurant fixtures with a timeless design. Our products are engineered and constructed using the principles of sustainable design to endure for generations, reducing the impact on the earth’s resources, and providing the lowest cost of ownership over time. We will work with you to create custom items that fit your projects.

PRODUCTS
Custom size modular planters and cost-saving multi-section runs. Easy to assemble lightweight modular planters, 10 minutes per section, created for rooftops and terraces, adding durable beauty throughout your projects. Our high-quality receptacles are designed for use in key locations where you want a great impression to reinforce your brand.

PERFORMANCE
Our products are built to last, with a lifetime structural warranty. DeepStream anodizes its proprietary aluminum parts for longevity; there is no paint or powder-coating to fail. Our Core Replacement Program will replace at manufacturer’s cost any component of our products in case of damage or unacceptable degradation in finish.

SUSTAINABILITY
Our products are built from primary materials that will last a lifetime. A combination of thoughtful design, quality materials, and careful craftsmanship creates products that are environmentally friendly because they can be repaired and refinished, rather than thrown away. Each item purchased plants trees through Trees.org.
ABOUT
DuMor Inc., a proud U.S. manufacturer of site furnishings, was founded more than 35 years ago based on the steadfast belief in providing the best quality product. This tradition of attention to quality, along with DuMor’s commitment to providing superior customer service, continues today and makes DuMor one of the leading names in the site furnishings industry.

PRODUCTS
DuMor Inc. manufactures a full line of top-quality site furnishings with the style to make any outdoor space attractive and functional. Choose from our more traditional designs or from our more recent contemporary designs.

PERFORMANCE
Efficient, quality-focused manufacturing processes, coupled with our people and materials, enable DuMor to set the standard for quality in the site furnishings industry. Our goal is to design site furnishings that fit space, whether matching a contemporary space, accentuating traditional architecture, or blending into the nature of a park.

SUSTAINABILITY
Our new wood grain recycled plastic is high-density polyethylene mostly derived from post-consumer bottle waste resulting in a product that is 95% recycled. This plastic is extruded with a multicolor tonal streaking and etched with a wood grain texture to achieve a realistic wood-like appearance and feel. Only available on select products.
ABOUT

For more than 35 years, Equiparc has been helping to make public spaces more beautiful by manufacturing street furniture that goes way beyond the utilitarian. Our standard and custom-built street furniture manufactured with a selection of recycled, sustainable and lasting materials provides a visual signature to public spaces worthy of the greatest landscape architecture projects.

PRODUCTS

We offer urban furniture collections developed in partnership with renowned designers and landscape architects, as well as custom-built site furnishings specifically designed for your projects. Each of our benches, picnic tables, waste and recycling receptacles, planters and bike racks is created to harmoniously accentuate any public spaces.

PERFORMANCE

Site furniture created to inspire, built to last. Our knowledge concerning the level of resistance of materials and fabrication techniques enables you to give life to your ideas with the assurance of a remarkable site furniture that withstands the harshest weather conditions as well as high-traffic environments.

SUSTAINABILITY

Equiparc only uses the highest density wood species, recycled and infinitely recyclable aluminum, hot dipped galvanized steel, no V.O.C. fumes powder-coated paint, stainless steel anchors as well as ultra-resistant 100% recycled plastic. Our materials are carefully selected and tested in order to meet the highest expectation of durability.
ABOUT
Form and Fiber Inc. grew out of the belief that landscape architects should be more involved in the design and creation of site furnishings for exterior environments. This belief cultivated a desire to offer new alternatives and levels of customization for commercial site furnishings with a simple, yet distinct, modern approach. Today, Form and Fiber designs and manufactures contract outdoor accessories that meld classic features with fresh, modern interpretation. We call it simply inspired design.

PRODUCTS
All concrete products are hand cast, utilizing a proprietary mix, and have a naturally pitted finish. Carbon steel, pre-weathered Cor-Ten® steel, and aluminum powder coated benches, planters, planter/retaining frames, and fused box systems are also available. Products are suitable for urban, retail, residential, and commercial applications.

PERFORMANCE
Form and Fiber’s concrete products are cast 3”–4” thick, incorporate fiberglass fibers for added strength and durability with an average 5,200 psi. Interior and exterior sealants are included for all concrete products for added protection. Steel and aluminum products are available in a variety of thicknesses with powder-coated stock color options.

SUSTAINABILITY
In all of our processes for both concrete and steel, we are mindful of the impact our practices have on the environment. All Portland Cement, sand, and aggregate is sourced within 500 miles of our facility. Surplus concrete mix, clean-out slurry, wood pallets, mold form wood, and drop steel are all captured and recycled for adaptive reuse.

ABOUT
Forms+Surfaces is a leading designer and manufacturer of site furniture and outdoor lighting used in public spaces worldwide. You’ll find our products in city centers, corporate campuses, parks, airports, universities and healthcare facilities. More than the sum of our product lines, we’re an integrated resource with the passion and expertise to help our clients achieve success. No matter what the size or scope of a job, we embrace our role as an innovative, responsive partner that landscape professionals rely on and trust.

PRODUCTS
From benches, bike racks, and litter and recycling receptacles, to lighting, sunshades, tables and chairs, our products invite creativity and provide real-world solutions for public spaces of all kinds. Choose designs from a single family. Or mix elements from multiple groups. You can easily create a unified look while meeting diverse needs.

PERFORMANCE
Solid construction, corrosion-resistant materials, and high-performance finishes contribute to our products’ ability to stand up to the long-term challenges of today’s public spaces. We design our products to be as durable as they are beautiful: specify Forms+Surfaces, and you get quality that lasts a lifetime, and designs that will endure.

SUSTAINABILITY
F+S products emphasize stainless steel, aluminum, FSC certified woods, UHPC, low- and no-VOC finishes, and high recycled content and recyclability. We have a comprehensive system to provide reliable, auditable environmental impact data to our clients, and a sustainability team that helps our customers meet sustainability standards worldwide.
ABOUT
Keystone Ridge Designs, Inc. is a team of people dedicated to making public spaces more beautiful and functional with the addition of site furnishings. Our mantra is to deliver excellence in all that we do, from the manufacturing of our quality benches, bike racks, litter receptacles, and more, to our exceptional customer service. We are a company guided by core values of how to do business, how to treat people and how to make great products.

PRODUCTS
Our unique and inspired site amenities suit any landscape environment and include benches, litter receptacles, bike racks, tables sets, recycling containers, planters, ash urns and bollards. From timeless, classic designs to contemporary, innovative solutions, we offer a diverse collection of patented products and customizable alternatives.

PERFORMANCE
Keystone Ridge Designs products are distinctive not only in design but also in their quality, durability and on-site performance. Our site furnishings are hand-crafted in the USA with complete weld-seams, commercial-grade recycled materials and our trademarked Keyshield® finish that protects each piece from chipping, cracking and UVA damage.

SUSTAINABILITY
We remain aware of the issues that face the environment, and we strive to be conscious of how our designs and manufacturing processes can contribute to a better community. From products that innately support LEED® building initiatives, to the use of recycled materials, we constantly maintain sustainability initiatives.
ABOUT
mmcité is not only a supplier of high-quality street furniture; our company is also a partner to all those who want to create something special within public spaces. Mayors of cities of all sizes, in the mountains or coastal areas, architects of small teams and large design institutions, construction companies of local or transnational importance—we address all of them with the aim of achieving the perfect project.

PRODUCTS
At the beginning, there is always a design sketch, a mere intention. The strong team of experienced and educated professionals create strong, high-quality products. Efficient functionality, careful processing and affordable costs are the main parameters that we monitor throughout the process. Modern design and distinctive expression represent a constant standard of mmcité.

PERFORMANCE
We combine the very best materials, which are further continuously tested. We take advantage of two sources. On one hand, our long-term experience, on the other hand, our constant effort to innovate the materials. Functionality, durability, esthetics and of course the price are the most important criteria for us.
ABOUT
Petersen Mfg. Company (PMC) creates site furnishings for world-class organizations across the country and around the world. Whether you need just one planter for a small operation or hundreds of tables and receptacles to address the needs of larger facilities, we have the right products for your particular need. Since 1913, we have built our reputation in the craft of precast concrete, steel, and glass fiber reinforced concrete—which sets us apart from the competition.

PRODUCTS
PMC Concrete and Metal Site Furnishings offer maximum durability and minimum maintenance. The rugged steel reinforced construction of our concrete products makes them an ideal solution for outdoor use. The gentle beauty, enhanced by a variety of color and texture options, offers versatility that will add aesthetic value to your property indoors and out. Choose from many styles of planters, bollards, tables, trash receptacles, drinking fountains, benches, and security barriers. Custom designs welcome.

PERFORMANCE
Petersen Mfg. Company is a full-service manufacturer. We have the capability and extensive experience in offering turnkey service on your site amenities project, from design and manufacturing to delivery and installation.

SUSTAINABILITY
PMC is dedicated to producing “Green Products.” Both our metal and concrete furniture lines are manufactured with a large percentage of recycled material such as recycled cement, recycled metal, and fly ash. In addition, our manufacturing facility has implemented many energy-saving features in an effort to conserve and produce products in a more eco-friendly environment.
QCP
P.O. Box 639
Norco, CA 92680

T: 951-737-6240
rcrook@qcp-corp.com
www.qcp-corp.com

ABOUT
QCP is a leading designer and manufacturer of precast concrete site furnishings and amenities since 1976. We are committed, with the help of our esteemed product designers such as Cliff Garten Studio, to push the boundary of what is possible with precast concrete.

PRODUCTS
QCP’s catalog is vast, with more than 500 standard products in the following categories:
- Planters
- Seating
- Waste containers
- Tables
- Gaming
- Fountains
- Tree grates
- Fire features
- Pavers
- Wall and pilaster cap
- Stair treads
- Pool coping
In addition to our standard products, we offer unmatched capability to produce custom creations.

PERFORMANCE
All QCP’s products are handmade in the USA by skilled artisans to last a lifetime. We manufacture our site furnishings in either steel-reinforced concrete (SRC) or glass fiber-reinforced concrete (Lite Crete). And for projects where weight is critical, we have developed a line of ultralight planters made from a high-performance concrete mix design.

SUSTAINABILITY
Sustainably is a core value at QCP. We have been producing products with a minimum of 21% recycled or post industrial waste content for more than 40 years. QCP also recycles 100% of our wastewater and all daily waste concrete. We will continue to strive to reduce our environmental footprint and help our customers meet their sustainability goals.
ABOUT
Sitecraft has been the architect’s choice for five generations. Along the way, we’ve distinguished ourselves as craftsmen who have mastered cutting curves out of solid wood. We’ve built on this mastery to include custom designs in wood, metal, and recycled plastic, which results in an unmatched repertoire that not only complements but defines your site. Premium materials, handcrafted attention to detail found only in the finest bench-made furniture, and enduring quality are the signature of Sitecraft.

PRODUCTS
Sitecraft offers a variety of site furnishings including straight and curved benches, planters, and site accents. We offer our products in a variety of woods and a high-density wood substitute called Greenwood. Sitecraft can help you find the material that works best for your site. You envision it, and Sitecraft can make it happen.

PERFORMANCE
Sitecraft stands behind all its products. We believe that the best product is one that is easy to maintain. We only work with the best materials. When designing your site, we can help you pick materials that will not only look beautiful but will withstand use for years to come.

SUSTAINABILITY
Sitecraft believes that sustainability is important. We work with suppliers who put sustainability as a priority. We offer FSC®-certified and reclaimed lumber as an option for most of our wood products. Sitecraft seeks to meet the needs of today’s customers while keeping in mind the needs of tomorrow’s customers.
ABOUT
A leading designer and manufacturer of steel and powder-coated furniture, SiteScapes has been offering high-quality site furnishings since 2001. Since its beginnings, SiteScapes has been determined to provide high-quality products at affordable prices with a focus on reliable customer service. Dedicated to remaining current in the marketplace, SiteScapes works hard to produce innovative, durable, functional, and attractive site furniture. All of SiteScapes’ furniture collections are rugged and designed to weather the rigors of any urban environment.

PRODUCTS
SiteScapes’s product catalog includes many styles and aesthetics. Furniture designs span modern and contemporary pieces to historic and heritage products. Products include park benches, trash receptacles, recycling bins, planters, bike racks, tables, chairs, tree grates and guards, and more. SiteScapes can also design and produce custom products.

PERFORMANCE
SiteScapes is dedicated to providing a comprehensive line of durable, steel site furnishings and offers a 20-year structural warranty on all products. SiteScapes products offer unlimited design flexibility for design and landscape professionals while providing quick and easy installation for contractors, maintenance crews, or municipal personnel.

SUSTAINABILITY
SiteScapes strives to make all of its products as sustainable as possible, by using environmentally friendly production methods, and designing durable, low-maintenance site furnishings. SiteScapes products utilize 99% post-consumer recycled steel for all steel bar product and 70% recycled steel sheet for all laser cut products.
ABOUT
Located in the heart of Minnesota, The Outdoor GreatRoom Company™ (OGC) manufactures unique, upscale products with design appeal for outdoor living spaces. Products include gas fire pit tables, gas fire burners, pergolas, outdoor kitchen islands, outdoor gas fireplaces, outdoor patio furniture, accessories, and custom products for residential and commercial applications. The team behind The Outdoor GreatRoom Company™ was the first to enter into the gas fire pit category, positioning OGC as the experts on outdoor fire. #BringHomeOutside

PRODUCTS
We offer short lead times on stocked gas fire pit tables, individual gas burners, ready-to-finish fire table bases, Direct Spark Ignition safety systems, wood pergola kits, custom outdoor kitchen islands, outdoor furniture, outdoor gas fireplaces, custom options, accessories, and more for your contract/commercial and residential projects.

PERFORMANCE
Crystal Fire® Burner Technology is the best and most reliable in the industry. Our products are UL, ULC, CE Listed to the ANSI Z21.97-2017/CSA 2.41-2017 standards. Certification includes rain, wind, clearance to combustibles, and construction standards. Our design-forward products are handcrafted in Minnesota from durable, outdoor-rated materials.

SUSTAINABILITY
Our pergolas are made out of select-grade Douglas fir from a sustainable forestry initiative. Most of our products are made right in the U.S., cutting down on transportation, energy, and other inefficiencies. We use #304 commercial-grade stainless steel. Stainless steel is 100% recyclable and does not contain any lead, which is required for brass.
Graber Manufacturing, Inc.
1080 Uniek Drive
Waunakee, WI 53597

T: 800-448-7931
jguberud@madrax.com
www.madrax.com
www.thomas-steele.com

ABOUT
Madrax and Thomas Steele are the industry leaders in handcrafted benches, tables, trash receptacles, planters, and bicycle parking racks, all of which are fabricated with care from the finest materials available. We also align ourselves with our customers as partners to assist them in achieving their goals and objectives.

PRODUCTS
At Madrax/Thomas Steele, we are committed to helping you identify solutions that work for your project. Our products are handcrafted and long lasting, thus eliminating the need to replace furnishings frequently due to long-term wear and tear and the possibility of vandalism.

PERFORMANCE
What distinguishes us from other companies is our industry-leading, five-year warranty and environmentally friendly e-Steele™ finish that comes on our furnishings. Our technical design and manufacturing expertise allows you to select the best style, configuration, and finish.

SUSTAINABILITY
Sustainability, especially environmental sustainability, is the key to our products. The steel used to manufacture our site furnishings is produced in the United States using the basic oxygen furnace process. Recycled content, especially post-consumer recycled content, is an important feature of many green products. Our products are made of up to 90% recycled material. Our recycled plastic consists of high-density polyethylene material (HDPE), also made from post-consumer recycled plastic.
ABOUT
Founded in 1999, Urban Fountains & Furniture designs and manufactures a range of public street furniture. The Urban brand has become synonymous with outstanding craftsmanship and aesthetically pleasing product design solutions. Urban offers an extensive range of customizable outdoor drinking fountains, with the ability to adapt and modify products to suit any project. With design and fabrication occurring in-house, Urban is able to quickly provide a tailored solution and customized service.

PRODUCTS
The Outdoor drinking fountain range includes disabled-accessible, bottle refill, and pet-accessible fountains. The fountains are available in powder-coated or stainless steel with accessories including filters. The Urban goal is to ensure water is available to keep the public hydrated and help reduce the growing problem of single-use plastic bottles.

PERFORMANCE
All Urban products are designed for maximum strength and functionality without compromise in performance or appearance. Urban is dedicated to providing long-lasting and durable drinking fountains that provide high-quality performance year on year. All fountains are durable and resilient enough to be used in high-use areas and harsh environments.

SUSTAINABILITY
Urban takes a holistic approach to proactively reduce waste and promote sustainability. This means that sustainable initiatives are prevalent throughout our company and extend through to our choice of materials, processes, waste management and the whole supply chain.
Victor Stanley, a leader in quality site furnishings, helps you bring your visions to life. From benches and bike racks to smart litter receptacles, which use our Relay Sensor and Service to enable efficient collection routing, we meticulously design, engineer and manufacture every detail to ensure our site furnishings will withstand the test of time. For over 57 years, we have helped create a place for people to gather, live life and make timeless moments.

**PRODUCTS**
Victor Stanley Relay™ sensor and service continuously monitors fill levels. It also conveys temperature, weight, location via GPS and collection status, in real-time and historically, for planning, scheduling, and routing collections more efficiently—saving an estimated 70–90% in collection expenses.

**PERFORMANCE**
An all-in-one solution, Relay features fully integrated sensors within new and existing Victor Stanley litter receptacles and recycling stations, wireless communications, and dedicated web portal for access to container conditions. Relay uses technology, sensors, and web services that we designed, built, and own, so you can rely on our product.

**SUSTAINABILITY**
Victor Stanley Relay™ monitors the fill levels and weights of all containers, so that they can be collected at the optimal time. This service saves on collection expenses and ensures resources are allocated efficiently, while reducing fuel costs and CO2 emissions, improving public health and bringing environmental equity to all parts of the city.

Smart cities aren’t born that way. They’re designed intelligently with Relay.
ABOUT
Since its inception in 1995, Wishbone Site Furnishings has become an industry leader in sustainably designed street furniture. Based in Vancouver, Canada, Wishbone designs and locally manufactures innovative and functional site furnishings with high recycled content, requiring little or no maintenance. Its products can be seen throughout North America in parks, cities and campgrounds, with the stylish designs retaining their fresh look after many years of active service.

PRODUCTS
Wishbone’s municipal-grade products are made with aluminum frames, durable plastic and stainless steel fasteners. From benches and tables to bike racks, waste receptacles and outhouses, Wishbone’s logo is proudly displayed on a wide variety of styles, including custom designs for diverse clients. Wishbone has recently extended its expertise to the construction sector, offering a range of recycled plastic building materials, including decking.

PERFORMANCE
With more than two decades of experience, Wishbone products are created to work exceptionally well and deliver outstanding value. Requiring low maintenance throughout their active life, each Wishbone product is made to withstand all weather conditions and heavy usage. Materials, powder coating and fastening systems are selected with durability in mind. Plastic boards can be renewed in place or easily replaced. By managing all stages of manufacturing, Wishbone backs its street furniture with a 10-year limited warranty.

SUSTAINABILITY
Wishbone has been leading the way in sustainable design for years, with a passion for repurposing waste materials into something superior to virgin materials. With all its products made from recycled or sustainable materials, Wishbone has diverted over 3 million pounds of plastic from landfills and oceans in the past ten years. Wishbone uses 100% co-mingled recycled plastic, and its foundry produces aluminum castings made from 100% recycled vehicle rims. At the end of their life cycle, all Wishbone products can be recycled again.
ABOUT
Since 1946 our commitment to providing only the highest quality greenhouses at cost-competitive pricing has made us the most trusted name in the horticulture industry. This is an honor we intend to maintain by making sure all of our customers get only the best greenhouses when they turn to us for assistance. Our one-on-one, personalized customer service ensures that your greenhouse specialist will be available to you every step of the way. Whether you are looking for a small greenhouse kit or a fully customized conservatory, our friendly staff will assist you from your first phone call, all the way through the construction process. In addition to beautiful, high-quality structures, we also offer a variety of industry leading greenhouse supplies and equipment. We are able to provide you with individual products, as well as create equipment packages specific to your greenhouse, and your growing needs. We invite you to learn more about our quality greenhouse structures, equipment, and supplies from our website or call us at 800-531-GROW to discuss your greenhouse project.
ABOUT
Parasoleil designs and engineers an uncommon line of architectural panel systems that bridge art and environment to create places where people want to be and connect. Now, we offer a turnkey solution that includes our artistic panels and the entire assembly, making it easier to specify, coordinate, and install. Filter light and frame space with our Eclipse Collection to bring new life to your projects.

PRODUCTS
The Parasoleil Eclipse Collection, our all-in-one structures, give you dependability and durability, as well as a captivating experience to connect people with nature. With alluring, artistic pattern choices, all panels, hardware, and posts are pre-engineered to deliver an enduring system for shade or screens. Easy to specify, order, and install.

PERFORMANCE
In the Eclipse Collection, choose from many options for shade, screen, or fencing to meet your project needs. Rest assured, the engineering and shop drawings have been completed for you to guarantee you can reduce your project lead time. The Solar Series and Lunar Series structures have been engineered to endure significant wind and snow loads.

SUSTAINABILITY
Our engineers have analyzed the total collection and their finishes for long-lasting performance. The entire assembly has been engineered to endure rigorous condition to receive certified status. All metals are protected with minimum 2-coat corrosion resistance or non-corrosive metals. We only use alloys that are designed for all-weather climates.
ABOUT
Renson® is a European trendsetter in outdoor products. The possibilities to protect yourself from the wind, sun, rain, or cold are numerous, and the expansion and personalization possibilities are varied. Your garden or terrace, and the rest of the environment around your home, become a natural extension of your home so that you can spend time outside and in the greatest comfort. Renson’s outdoor products provide that extra living space, completely adapted to your own style and based on your own wishes.

PRODUCTS
RENSON Outdoor offers outdoor louvered roof structures, carports, outdoor lighting, outdoor benches and planters and exterior design cladding. Our products are highly innovative in both their look and design. Seamless integration of optional elements, hidden fixings and fasteners, durable materials and smart solutions.

PERFORMANCE
Our high-quality products are manufactured in-house using our ultra-modern production facilities. We put our products through their paces in the most extreme situations to ensure the end result is flawless. This testing process means our customers can rest assured they’re investing in the highest quality.

SUSTAINABILITY
All of our products are made out of extruded aluminum, the most durable material. Our products are designed to retain their quality and ease of operation for many years, in all types of weather. To ensure you can enjoy our products every day with as little maintenance as possible, we use materials of the highest quality that are guaranteed to last.
ABOUT

ABOUT
Walpole Outdoors was founded in Massachusetts in 1933. The original wood of choice was northern white cedar. Products are now also offered in several woods, metal, and in AZEK. This low-maintenance material has the look and feel of natural wood, yet won’t rot, split, or warp. Walpole is the nation’s largest and most experienced cellular PVC fabricator. Other innovations include inline coating of factory finish stain or paint. Walpole has stores and authorized partnerships nationwide.

PRODUCTS
Walpole Outdoors handcrafts more than 40 standard fence styles, pergola kits, and custom pergolas in AZEK or wood, with or without a retractable canopy. Other products include gates, lattice and trellis, outdoor structures, tennis courts, small buildings, mail posts and mailboxes, lantern posts, window boxes, planters, and planter boxes.

PERFORMANCE
Working from drawings or photographs, Walpole will replicate historical fence, finials, and railings. Projects include the Ocean House, Watch Hill, RI, and the Linden House, Washington, DC. We can also custom fabricate from your drawings or designs. Our experience includes schools, colleges, restaurants, assisted living facilities, and more.

SUSTAINABILITY
Today’s customers, who value their time relaxing and entertaining in their own backyards, are drawn to Walpole’s handcrafted AZEK cellular PVC products. This low-maintenance material has excellent moisture, rot, and termite resistance. Our outdoor products save on long-term care, repair, replacement, and are designed to last.
ABOUT
With more than 25 years of water experience, Aquatix® is a leader in water feature and spray park design, fabrication, and construction. Pioneering integrated recirculation systems, the company provides a sustainable solution that empowers hours of innovative activity without water consumption limits. By joining forces with leading playground equipment manufacturer Landscape Structures Inc., Aquatix will apply the groundbreaking design and innovation they are known for toward the creation of imaginative new water experiences.

PRODUCTS
Aquatix designs interactive water park and splash pad products that encourage kids to experience water in novel ways. From aim-and-sprays to dumping buckets, ground sprays, and much more, our water products provide an inclusive, sensory-rich nature play experience in water for children of all ages and abilities.

SUSTAINABILITY
Aquatix delivers both domestic/single-pass systems and recirculation systems, and offers various products to help reduce water usage in spray park and splash pad designs. Activation bollards and step activators help regulate water consumption, while a wide range of water-flow options meet budget and flow needs.
ABOUT
Blue Thumb manufactures products to help you design, install, and maintain better water features like fountains, garden/koi ponds, and pondless waterfalls. We have 2000+ unique fountains that are shipped as complete systems atop our patented Aqua Box reservoir basin/pump system. When you work with Blue Thumb, you are working directly with the source, and we’re here to assist you the entire way—from initial design, to conception, installation, and enjoyment. Our systems are turnkey and feature everything you need to complete a professional installation.

PRODUCTS
- Aqua Bella fountains
- Ceramic vase fountains
- Tuscany fountains
- Copper tree fountains
- Zenshu fountains
- Basalt and travertine fountains
- Onyx, marble, and sandstone fountains
- Sphere fountains
- Liquid art fountains
- GFRC fountain boulders
- Granite fountains
- Formal falls for retaining walls
- Ponds and pondless waterfalls

PERFORMANCE
For more than 20 years Blue Thumb products have been manufactured specifically for professionals for use on both residential and commercial applications. We manufacture most of our products at our facility in Saginaw, Michigan, using the latest technologies and processes to ensure long-lasting product quality and integrity.

SUSTAINABILITY
We have our own rotational molding machine that helps us reduce waste and energy costs as well as fuel and freight costs. We also use recycled resins in all of our reservoir/basins, skimmer filters, waterfall filters, and all other plastic manufactured products.
ABOUT
French Fountains, Inc. of New Orleans was founded in 2002 by Michelle LeBlanc, an avid collector and design consultant of historical garden elements. The original St. Charles Avenue gallery showcased exclusive antique fountains and garden elements. In 2006, she launched her casting division, The French Casting Company, to reach a broader audience with her signature offering: The French Fountain Collection, offering exquisite stone castings of 17th century fountains made from exacting molds, available for a fraction of the antique originals’ price.

PRODUCTS
Designers and architects from around the country consistently chose for their discerning clients castings from our French Fountain Collection due to the intrinsic beauty of these classic castings in limestone of 17th century Provincial fountains and for the exceptional price point. Also offered: bronze, cast iron, marble, fire/water, and custom design.

PERFORMANCE
The casting in stone of the 17th century French Provincial Town Fountain shown is our most popular fountain, as it captures the essence of villages in southern France. Made of blocks of hand-cast limestone, each mirroring the chisel marks in the weathered stone of the original, its coping surround and tower comes in several sizes and period finishes.

SUSTAINABILITY
The enduring quality of our cast limestone is made from the finest composition of earthly elements. As with the antique originals, these solid blocks of stone age beautifully over time, taking on the patina of the surrounding fauna. Water flows from hand-forged copper spigots, recirculated by oxygen-regenerating submersible pumps. Online catalogue available.

ABOUT
Water Odyssey™ by Fountain People, Inc. promotes the use of water features as significant design elements in all architectural, recreational, and entertainment environments. We provide our customers with the industry's highest quality of products and design support service to ensure the successful completion of their water feature installations. Our design teams work with architects, landscape architects, aquatic consultants, artists, and end users around the world to develop new, innovative wet play environments and equipment.

PRODUCTS
Water Odyssey offers a wide variety of spray features including above-grade and ground sprays, contemporary and theme designs, water conserving and interactive options, recirculation and potable systems, and control solutions. From custom creations to traditional spray features, Water Odyssey can bring your vision to life and make every drop count.

PERFORMANCE
Water Odyssey products incur a rigorous process of quality control to ensure safe operation, dependability, durability, and optimal performance. Specialized controls and systems help to prolong the life of hardware and pumping equipment. Materials such as stainless steel, copper, marine-grade naval brass, and FRP offer consistency and quality.

SUSTAINABILITY
From rainwater collection for our test-pool to utilizing VOC-free adhesives, sealants, and coatings in our manufacturing processes, Water Odyssey takes environmental responsibility seriously. We work hard to ensure our water feature equipment is manufactured from either recycled or recyclable materials and is designed for longevity.
